CAUTION! DO NOT USE ACETONE, MEK OR ANY OTHER SOLVENTS to clean the Micro coated gloves or the Dream Skins as these items will damage the coating.

Micro Coated Vinyl (MCV) gloves from Fillauer and the Dream Skins from Fillauer are treated with a protective micro thin coating. This layer is designed to resist staining with normal hand washing. It also gives reduced friction from the MCV Glove and the Dream Skin against clothing etc.

MCV Gloves and Dream Skins should be washed as soon as possible after marks are incurred to reduce the possibility of permanent stains. Marks left overnight may cause permanent stains.

MCV gloves and Dream Skins can be cleaned with soap and water, alcohol or Cleani Stump swabs.
